

## Repair Procedure & Repair Training

Air Systems' Repair Department can assist with repair questions over the phone or via email. To assist in the effort, please locate the model number and serial number prior to contacting the Repair Department. Both numbers are required to provide the correct manual or engineering schematic, replacement parts, filters, or answer other questions. Typically, most in-house repairs are completed in 24-48 hours.

**The model and serial numbers are required to issue a Return Authorization (R/A) prior to returning equipment to Air Systems for repair or certification.**

To contact the Repair Department or obtain a Return Authorization:

Phone (800) 866-8100 or (757) 424-3967

and ask for Amber or our Repair Services Department

Email: [repairs@airsystems.com](mailto:repairs@airsystems.com)

To arrange repair training at Air Systems, contact Amber.
