

# Emergency Response Lighting

## Air-Light® Portable Area Light Series

*Portable Area Lighting for Emergency Reponse, Industrial, and Highway Applications*

**Issue:** In an emergency situation, portable lighting is required to illuminate spaces such as medical triage, temporary command centers, and hallways / stairwells. Portable lighting is also required in search and rescue applications and other emergency response situations such as traffic control. Flash lights do not provide enough lumens to illuminate a large work area. Towable light towers can be hard to store, hard to rent in an emergency, require fuel to run, and can create noise issues.

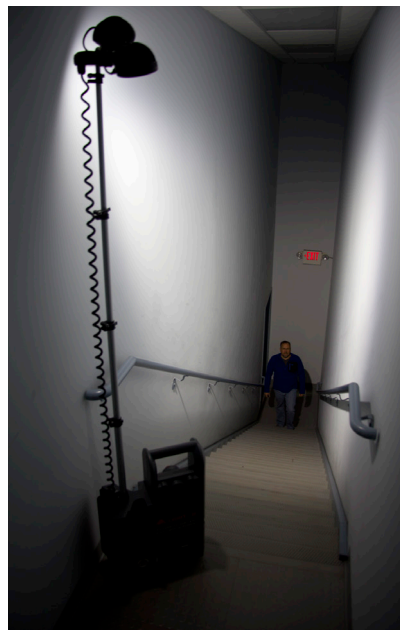

**Application:** In order to light up a temporary workspace, triage area, parking lot, or other space requiring emergency lighting, a small, portable, and bright light source is needed.

**Recommendation:** The Air-Light® series can be ordered with a variety of lumen configurations to provide light for large areas. The Air-Light® has a telescoping pole, providing light from above to illuminate a room, field, hallway, or other work space. The Air-Light® series runs off of and can run from 5+ to 14+ hours depending on lighting configuration and can be used while charging. Easy to store, multiple other uses when not being used in an emergency are all advantages to the Air-Light®.

- For use in ALL WEATHER CONDITIONS AND TERRAIN!
- IP54 rated for dust protected and water splashing
- Can be charged from external 12 VDC or 110-240 VAC power sources
- Can operate while charging
- Power port socket for charging the internal battery or powering cell phones or other devices utilizing 12 VDC power
- Air-Light® delivered fully assembled
- Air-Light® deploys/stows rapidly without the use of tools
- Stainless steel legs to create stable base
- Operational in sustained 35 mph full frontal winds, 65+ mph rear winds
- Aluminum mast extends 30" to 96" above ground depending on model

### Air-Light® Applications

- Emergency Response
- Hospital Triage
- Crime Scene Investigation
- Power Outages
- Traffic Control
