

REEL-PAK™

Portable SCBA Cart

The REEL-PAK™ cart combines SCBA's and hose reels on a compact cart, allowing easy transportation to work sites. Ideal for use in hazardous locations, confined spaces, and emergency response situations.

The REEL-PAK™ SCBA cylinder carts are designed for confined spaces or industrial applications where work conditions require the use of pressure demand airline respirators. The REEL-PAK™ combines two reel hoses and two SCBA's on an easy to transport cart. The two reels store airline respirator hoses and comes with manual or automatic reels. Two additional fittings on the back can be used for additional workers or on standby for emergency responders.

Applications

- Oil & Gas Operations
- Refineries
- Tank Cleaning
- Confined Space
- Power Plants

For Use In
Hazardous
Locations
